PROFESSIONAL SUMMARY

An Aspiring Software Engineering student with good academic achievement and comprehensive knowledge of **Java, Python and SQL**. Good Understanding of software development lifecycle methodologies and industry best practices. Demonstrates **full stack development frameworks** expertise, Microsoft Azure fundamentals and optimizing database architectures across **SQL and NoSQL (MongoDB) environments**. Knowledge in Generative Artificial Intelligence tools, cybersecurity fundamentals and Microsoft Office tools. Completed **Artificial Intelligence and Machine Learning specialized internship from AICTE**. Exhibits strong collaborative leadership skills, demonstrates agility in the approach of methodologies. Ready to apply technical competencies and strategic digital thinking in a position to contribute significantly to the enterprise consulting solutions and organizational goals.

EDUCATION

- Bachelor of Technology (Computer Science & Engineering) || JIS UNIVERSITY
Achieved average **CGPA : 8.97** || **Equivalent Percentage : 89.7 %** [2022 - 2026]
- Higher Secondary Education [12th] (Major : Science) || BASANTI HIGH SCHOOL, WBCHSE
Percentage : 79.4 % [2019 - 2021]
- Secondary Education [10th] || BASANTI HIGH SCHOOL, WBBSE
Percentage : 86 % [2018 - 2019]

TECHNICAL SKILLS

CODING LANGUAGES

- JAVA
- C
- SQL
- Python

WEB DEV TECH

- JAVASCRIPT
- React JS
- HTML & CSS
- Node JS

DATABASE TECHNOLOGY

- MongoDB
- MySQL
- MS SQL Server
- PL/SQL

OTHER EXPERTISE

- Experienced in Generative AI Tools
- Experience in Linux
- Microsoft Azure
- Streamlit, Vercel : Hosting Platforms
- Microsoft Office Tools

SOFT SKILLS

- Leadership
- Situation-handling
- Quick-Learner
- Critical-Thinking
- Problem-Solving
- Effective Communication

PROJECT

- 1) LIFE LINK - Healthcare Management System : [🔗 GitHub Repository LIFE LINK](#)
 - Life Link is a full-stack healthcare management system built with **React.js, Node.js, Express.js, MongoDB, and JWT**,
 - In-built chatbot powered by the **Gemini API**.
 - It offers mobile-responsive design, **encrypted data storage, secure login**, and **seamless doctor appointment** scheduling.
 - Optimized for speed and security, the platform streamlines clinical workflows, enhances patient engagement, and elevates digital healthcare.
- 2) ETHER VOX - Decentralized Voting System Using Ethereum Blockchain Technology : [🔗 GitHub Repository EtherVox](#)
 - **Multi-Database Architecture** - Innovation in MySQL, MongoDB and Ethereum Blockchain for efficient data management and immutable storage of votes.
 - **Glass Morphism Interface** - Stunning modern UI animated gradients , responsive design, pro animations for better user experience.
 - **Dual Authentication** - Role based access control with JWT Tokens supporting both the Admin & User Dashboard along with the secure credential Management.
 - **Real-Time Vote Tracking** - WebSocket integration for live counting of votes, instant showing of results with live, real time coordination between users.

To view additional projects, please visit my [GitHub](#) profile.

PROFESSIONAL EXPERIENCE

- Edunet Foundation – AICTE Internship : IBM Skills Build** [🔗 Streamlit Cloud Deploy Link](#) [🔗 GitHub Repository](#)
- A formal virtual Internship that integrates self-placed, e-learning with weekly, mentor-led technical training and offers hands on experience in Artificial Intelligence and machine learning.
 - Created the project of the Employee Salary Prediction with Python where the focus was made on the development of a predictive model.
 - Used Python packages to clean data, train regression models and performance evaluation to build machine learning and data analysis capabilities. Squared up the project by developing a web interface to model outputs with the Streamlit Cloud.
 - Provided a final presentation of project results, with a focus on competence in machine learning and technical communication.

CERTIFICATION

- Google **AI Essentials certification** From Coursera
- **Cybersecurity certification** From Coursera [Basic fundamentals]
- **Computer Architecture** From NPTEL [58 %]
- **Programming in JAVA** From NPTEL [78 %]
- **TCS ion Career Edge–Young Professional certification**
- **Artificial Intelligence Fundamentals** From IBM Skills Build

LANGUAGE

- English (Working Proficiency)
- Hindi (Working Proficiency)
- Bengali (Expert proficiency)

INTERESTS

- Puzzle Solving
- Playing Chess
- Technical Reading
- Equity Market Research
