PROFESSIONAL SUMMARY

Full-Stack Developer with a strong foundation in the MERN stack. Expertise in designing and optimizing SQL and NoSQL databases within full-stack architectures. Track record of delivering complex Web Development and Machine Learning projects Using Github, Vercel and Streamlit that demonstrate strong technical skills, effective collaboration, and problem-solving abilities. Familiar with cybersecurity fundamentals, gaining hands-on experience in AI and machine learning. Awarded the GitHub Student Developer Pack, reflecting proactive engagement with the developer community. Eager to apply these skills within collaborative full-stack web development teams.

EDUCATION

Bachelor of Technology (Computer Science & Engineering) || JIS UNIVERSITY

Achieved average **CGPA : 8.94** || **Equivalent Percentage : 89.4 %**

[2022 - 2026]

Higher Secondary Education [12th] (Science) || Basanti High School, WBCHSE

Percentage : 79.4 %

[2019 - 2021]

TECHNICAL SKILLS

CODING LANGUAGES

- JAVA
- C
- SQL
- Python

WEB DEV TECH

- JAVASCRIPT
- React JS
- HTML & CSS
- Node JS

DATABASE TECHNOLOGY

- MongoDB
- MySQL
- MS SQL Server
- PL/SQL

OTHER EXPERTISE

- Generative AI
- Experience in Linux
- Microsoft Azure
- Streamlit, Vercel

SOFT SKILLS

- Leadership
- Situation-handling
- Quick-Learner
- Critical-Thinking
- Problem-Solving
- Effective Communication

PROJECT

1) LIFE LINK – Healthcare Management System :

- Life Link is a full-stack healthcare management system built with **React.js, Node.js, Express.js, MongoDB, and JWT**, [🔗 GitHub Repository LIFE LINK](#)
- In-built chatbot powered by the **Gemini API**.
- It offers mobile-responsive design, **encrypted data storage, secure login**, and **seamless doctor appointment** scheduling.
- Optimized for speed and security, the platform streamlines clinical workflows, enhances patient engagement, and elevates digital healthcare.

2) CABIO – Real-Time Ride Management :

- A ride-sharing platform featuring real-time coordination between users and drivers via **Socket.IO**, enabling seamless ride requests. [🔗 GitHub Repository CABIO](#)
- Designed and implemented robust **APIs** and secure **authentication (JWT)**, supporting *user registration, profile management, ride handling*.
- Built an intuitive, responsive user dashboard with interactive mapping and social engagement features to enhance real-time ride tracking.
- Architected a scalable **Node.js/MongoDB** backend with *WebSocket integration* to support *high availability, real-time performance*.

To view additional projects, please visit my [GitHub](#) profile.

PROFESSIONAL EXPERIENCE

Edunet Foundation – AICTE Internship :

[🔗 Streamlit Cloud Deploy Link](#)

[🔗 GitHub Repository](#)

- A structured virtual Internship combining self-paced e-learning with weekly mentor-led technical sessions, providing hands-on experience in Artificial Intelligence and machine learning.
- Developed the “**Employee Salary Prediction**” project using **Python**, focusing on **predictive model development**.
- Utilized **Python libraries** to preprocess data, train regression models, and evaluate performance, reinforcing machine learning and data analysis skills. Expanded the project by creating a basic web interface for model outputs using **Streamlit Cloud**.
- Delivered a final presentation of project outcomes, highlighting proficiency in machine learning and technical communication.

CERTIFICATION

- **Google AI Essentials certification** From Coursera
- **Cybersecurity certification** From Coursera [Basic fundamentals]
- **Advanced Computer Architecture** From NPTEL [58 %]
- **Programming in JAVA** From NPTEL [78 %]
- **TCS ion Career Edge–Young Professional certification**
- **Artificial Intelligence Fundamentals** From IBM Skills Build

LANGUAGE

- English (Working Proficiency)
- Hindi (Working Proficiency)
- Bengali (Expert proficiency)

INTERESTS

- Puzzle Solving
- Playing Chess
- Technical Reading
- Equity Market Research
